Many health and government organizations have provided cleaning and disinfection guidelines to aid in maintaining safe environments during the COVID-19 pandemic. Specifically, the CDC has provided a 3-step plan:

### 1. Develop Your Plan

- Areas unoccupied for 7 or more days need only routine cleaning
- Wear proper personal protective equipment

### 2. Implement

- Clean before disinfecting surfaces
- Use EPA-approved disinfectants and follow label instructions

### 3. Maintain and Revise

- Routinely disinfect frequently touched areas, at least daily
- Continue safe practices such as wearing face masks and gloves, and maintaining safe social distances
